Kraked by Khamen

Released by Pretzel Logic at Forndata 2020-12-19, out of compo (no Xmas theme)

Background:

Tutankhamen is one of the iconic C64 images, mostly know through Bob Stevensons excellent version from 1986, but also used in demos by XAKK, Censor Design and others. Pretzel Logic wishes the scene a Merry Xmas with an old skool flavored demo featuring rasterbars, a dysp scroller in the sideborder and logos in the upper and lower border – all connected with a graphical theme from the past! Mikael made the 2020 version of the picture in multicolor.

Code: Epsilon
Picture: Mikael
Charset: Spiham
Music: Mibri / Multistyle Labs
